## ENVIRONMENTAL COMMITMENT

We are committed to environmental stewardship and sustainable development. We do not own timberland, are not timber producers and have no logging operations. We are buyers and sellers of forest products and building materials. Therefore we feel a responsibility to the worlds forest lands. We are both an environmentally and a socially responsible organization that has been specializing in selling quality North American wood products to the Pacific Northwest community since 1946. We pride ourselves on fostering relationships with mills and manufacturers that practice in an environmentally and a socially responsible manner.

Our practices reflect the best possible industry standards; this is important for our customers, for our communities and for the conservation of our natural resources.

## COMMUNITY COMMITMENT

The organizations below are an important presence in our city and we are happy to support them and their missions.
